Company

Steuer Nederland supplies on a project basis, specialised in made-to-measure delivering a range of products for full-scale projects. Ranging from approved standard products to highly sophisticated specials.

Steuer Nederland supplies products for e.g. the offshore, chemical and petrochemical industry, power companies, as well as for machine and equipment manufacturers. Steuer Nederland owes its excellent reputation first and foremost to the company vision that quality, accuracy, competence and service should exceed formal certification standards. Every single employee is fully aware of the fact that our products are part of a safe connection. Therefore, irrespective of the size or scope of the supply, each Steuer product meets the highest possible standards.

We can make the connection between your demands and our expertise.

Value-added services

Offering value-added services is what makes Steuer Nederland stand out. They are all based on certification in accordance with ISO 9001, approved by Lloyd's Register Quality Assurance, a guarantee for our customers that all the appropriate procedures are being applied. But there's more to it than meets the eye. Allow us:

Supplying on a project basis

Owing to the close co-operation with our German parent company, an extensive network and a wide experience, Steuer Nederland is the ideal partner for made-to-measure products. One single delivery can entail products made of stainless steel, nickel or low alloyed as well as carbon steel.

Keeping a system of certification

A correct product certification is paramount. Having the appropriate certificates at hand wherever the actual project is carried out, prevents unnecessary and time-consuming delays. To achieve this, Steuer Nederland utilises a completely digitalised system of certification.

Inspection opportunities

The large Sliedrecht-based warehouse offers outstanding possibilities to conveniently arrange the products in stock for inspection purposes.

Cutting and re-marking

Steuer Nederland has the disposal of a 'Declaration of Re-marking Acceptance', provided by Lloyd's Register Nederland B.V. - Stoomwezen. Because of that Steuer Nederland is authorised to re-mark on their premises any piping product that has been cut.

Drawing and strength calculations

Steuer Nederland provides drawing and strength calculations according to Stoomwezen standards.

Container haulage

Temporary storage and transfer by container is possible at the Sliedrecht-location.

Expedite department

The expedite department employees see to it that your order is executed in perfect accordance with your instructions.

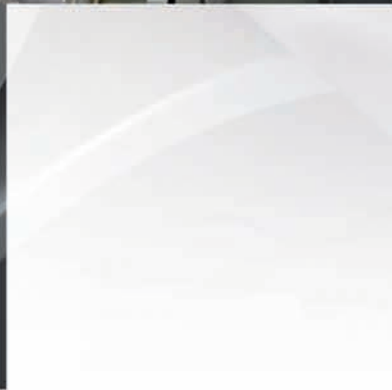

Products

Steuer Nederland has a large stock of stainless pipes, fittings and flanges available within the scope stipulated by ASTM/ASME and ANSI-standards.

Steuer Nederland distinguishes between the stock on hand and a full-range delivery programme. The latter enables Steuer to supply all kinds of products efficiently and on demand, whatever the required finish, dimension or material. Not only according to ASTM, but also according to DIN/EN and API standards. It consists of a range of seamless or welded pipes, fittings, flanges and specials based on one-off drawings. Be it nickel or low alloy, stainless or carbon steel, the delivery programme of Steuer Nederland includes all.
